### Sporting Notes.

Well, everything points to a bigger and better year in all sports. The big prospect at the moment should be the coming sports day on July 1st. This year the boys have an early start, and many improvements are expected over previous years. The final program will be given out after May 28, when the Executive meets to complete all plans.

At the last Executive meeting it was decided not to have horse races. Due to the expense and possible hitch, such an event would be

### 75 Lawyers in Parliament.

Lawyers to the number of 75 easily take the lead in making up this House of Commons of 245 members which comprises the 18th Parliament of Canada. These lawyers far outnumber the next class in number, 39 farmers. Then come 21 merchants, 13 doctors, 7 teachers, 6 gentlemen, 5 agents, 5 engineers, 4 lumbermen, 4 insurance agents, 4 innkeepers, 4 manufacturers, 4 retired, 4 secretaries, 3 clergymen, 3 journalists, 2 druggists, 2 dentists, 2 contractors, 2 publishers, with the balance scattered.

impracticable. At the same meeting a sum of \$35 was voted, to improve the caliber of baseball for the first. This is a step in the right direction. Baseball is our major attraction; and the better the game, the better is the crowd pleased.

While on the subject of baseball it should be mentioned that the local club has been reorganized and plans for an entry into a strong league have been received favorably. As the personnel of the league is not known definitely, definite announcements cannot be made till the next issue.

The Golf club has installed the Executive of last year with F. W. Yeats as Pres. and E. E. Moyse as secretary. The course was opened in style on Wednesday.

The Tennis club, also, is set for another season. The courts are in good shape. Following are this year's officers—Pres. H. C. Oakway; Vice, W. Oppertshauer; Secretary, Treas. P. Comissarow; Committee, The Messrs E. Malloch, N. Kowarsky, E. Wadell.

### To Stop Red-riders.

Detachments of the Canadian Mounted Police throughout Canada have received orders to continue again this year their patrols of the railway yards to halt movement of transients.

### "Oh, Herbert!"

That delightful comedy "O Herbert" was played in Kelly's hall on Friday night to a fairly large house, and kept the audience in good humor all thru the three acts.

Mr. Bert O'Brien as Herbert Kalness was a treat, in himself. As a little big man, half-made, he continually harped on his favorite topic: "I went to work in a factory at 10 years of age, and worked 12 to 16 hours; at 12 I earned good wages; at 14 years I was the sole support of the family; at 34 I owned and operated the factory; and now, at the age of 62 years," and so on, etc.

Naturally, with a character like this in the play, there was bound to be some amusing situations, and there were—one of these occurring when Herbert tendered his opinion on college-bred young men, and the very emphatic reply given him by one of the college-bred young men.

Miss Mary Doney as Mrs. Kolness played the part delightfully, and was at her best in the 3d act, when she put the husband "in his place" and ironed out the domestic difficulties to the satisfaction of everybody all.

Others who played their parts in a very pleasing manner were: Miss Rose Mushniak, Miss Catherine Clermont, Miss K. Hawkes, Miss Rose Norrington, Miss C. Chislohm, Miss M. Holland; Messrs J. Boyle, J. McMahon, G. Roberts, W. Amerongen, J. Madore, J. McGrath.

### Sports Club Meeting.

The adjourned meeting of the Dominion Day Sports Club was held in the town hall with Chairman Geo. Oppertshauer and Secretary E. Dannehauser on hand. This was the combined meeting of all the committees. One matter up for consideration was, the granting of a sum of money to the baseball organization of the town. After considerable discussion as to the club's standing, the sum of \$35.00 was granted.

No request for a grant had been put in by those representing the basketball organization, so the matter of a grant to them was not discussed.

It is a matter for congratulation that in preparation for the Dominion Day celebration are off to a start. It is to be hoped that interest in the big yearly event will not let, and that the coming event will be The Biggest and Best!

Another meeting of the committee will be held on Thursday, May 29th.

### A Double-header.

Wednesday, June 3rd, is to be a red-letter day in town here, as on that date four charming young people, all native-born, are to face their pastor for the purpose of being hooked up for life. The osterer has been hired, and the groomsmen and bridesmaids chosen, as also have the flower girls and pages. The Sun is not at liberty to mention the names of the contracting parties at present, but these can easily be obtained by anyone interested.

## The League and World Security

Have the League of Nations proved a failure? Have the efforts of millions of people to put into effect the principle of collective security for the nations of the earth been abortive? Should the League, in the light of recent events, be abandoned and allowed to die? In fact, is the League already gagged, helpless and practically defunct?

These are questions which are agitating the minds of peace-loving people in all the countries of the world to-day? Many who saw the birth of the League a few years ago as an insurance policy against future conflagrations between the nations are now shaking their heads sorrowfully and are on the verge of abandoning hope. They are fearful that the nations are to revert to former practices and policies of "dog eat dog and the devil take the hindmost."

It is pointed out by these pessimists that to date the League has two apparent failures to its credit, or should it be said, to its discredit? They refer to the inactivity of the League when Japan two or three years ago was allowed to launch unbridled an aggressive campaign to bring Chinese territory under control—a process which is still being carried on, and more recently the failure of the League's attempt to stem the victorious march of Mussolini's troops into Ethiopia, by the application of economic sanctions.

It is true that Mussolini appears to have achieved his immediate objective and not only conquered Ethiopia, but has also annexed the country as an adjunct to the Italian crown, despite the efforts of those countries which remained in the League to prevent Italy from gathering the fruits of her lawless enterprises.

The fact, however, should not be overlooked that while Italy has so far succeeded in her ambitious program of conquest in Africa, the nations have not yet withdrawn sanctions against her and that by the continued application of this form of pressure it is still possible to force the victor to disgorge, if not all, at least a portion of the spoils of an illegal war.

In other words the flouted members of the League still have it within their power to demonstrate to Mussolini that international lawlessness does not pay. All that is needed, as pointed out recently by the Winnipeg Tribune is decisiveness. "The members of the League," said the Tribune, "can, by showing a little courage and determination at this juncture make it more of a living and vital force than it has ever been," but this newspaper adds, "unless they show some courage and determination in the present circumstances the League of Nations and collective security will vanish like the snows of yesteryear."

The Tribune further points out that Mussolini after all has only won the first race and "is still racing against time in the application of the economic sanctions which are slowly but surely strangling Italy into submission. He cannot win that race unless the League members weaken and allow him to escape from the inexorable pressure."

There are very cogent reasons why wavering faith in the League should be restored. One of them is the urgent desire of the great masses of the people in the majority of the countries of the world for peace and security, so essential if economic recovery and progress is to be made. All that is necessary is for these people to strengthen the hands of their representatives by impressing upon them this viewpoint.

Another and very potent reason is the necessity for continuance and strengthening of the League and its powers if civilization is to be preserved. There is no blinking the fact that the majority of the European nations are armless to the teeth and in some cases at least, conquest and subjugation are unrestrained motives. If that is true, a strong League is the only hope of security from further aggressions which may well involve the entire world.

Warnings of this very grave danger have recently been uttered by some of the outstanding statesmen of several countries and they are warnings that should not go unheeded.

That such a war is not only possible but "inevitable" is the opinion of General Ludendorff of Germany who makes this very clear in his new book whose very title is significant, "The Total War." According to a commentator on this book in *Les Annales* of Paris, Ludendorff only admits a war which engages the existence of the entire nation—men, women and children; in other words, a war conducted without mercy, "its only aim being the total annihilation of the enemy."

Apparently a strengthened and revived League is the only hope of security the nations can expect against such "a war of frightfulness."

## The Newest Light Control

Cameraman in Hollywood Uses Cellophane To Reduce Glare

Now, they're wrapping light in cellophane. Ernest Palmer, Hollywood cameraman, is credited with devising the new technique in light control.

"When natural light is being used," he explained, "it is often difficult to control its intensity. In such cases, I found it helpful to cover the windows with cellophane. Clear cellophane materially reduces glare."

"Morning sun, often too intense, is controlled by sheets of yellow cellophane. When backgrounds are shadowed, as in the afternoon, I use yellow cellophane."

## Honored After Many Years

Body Of Leper Apostle Now Rests In Belgium

Father Damien, Belgium's famous "leper apostle," who spent most of his life on the leper island of Molokai, Hawaiian Islands, was buried in a crypt at Louvain, Belgium, after lying in state at the Holy Heart chapel. Thousands filed past his coffin and prayed. A monument is being erected to his memory. The body of the priest was taken to Belgium for belated recognition of his work. He died in his voluntary exile among the lepers of Kalawao, February 15, 1889, and the body was exhumed for the trip back to his homeland.

WAKE UP YOUR  
LIVER BILE—

And You'll Jump Out of Bed in the Morning

The liver should pour out two pounds of bile into your bowels daily. If this bile is not flowing freely, your food does not digest. It first decays in the bowels, then it builds up your stomach. You get constipated. Bile is a solvent. It dissolves the fats and oils in the food and carries them to the cells of the body. A more powerful solvent does not always get at the cause. You need something that works gently but sure. It takes three good old Carter's Little Liver Pills to get these two pounds of bile flowing freely. They do the work of a solvent but have no harmful or mercury in them. Carter's Little Liver Pills by name! Stubbornly refuse anything else. See.

## Destroys Bacteria

New Device That Will Be Of Assistance In Operations

Invention of a new type of cool germ-killing rays that destroys air-borne bacteria about the patient on an operating table was announced to the American Association of Thoracic Surgery by Deryl Hart, M.D., of Duke University Medical School.

The rays come from long, slender tubes framing the light above the operating table. Their rays were selected wavelengths of ultra-violet—which kill air-borne germs in 60 seconds, but do not burn human beings.

The tubes were designed by Dr. Robert F. James and Dr. Harvey Rentchler of the Westinghouse Lamp Company.

## Prefers Old-Fashioned Way

Lancashire Man Thinks Travel With Horse Is Safest

Tom Whittam, from Blackburn, Lancashire, drove his pony and trap into London with a proud flourish, having covered the 210 miles from home in six days.

Five-year-old Dolly, the pony, did not seem so happy. The traffic and the gasoline fumes frightened her.

Mr. Whittam says he made the trip "to show that for dependability, sureness, safety, travel by horse and cart, pony and trap is still by far the best."

## Must Discard Old Clocks

Los Angeles has ordered 200,000 sixty-cycle clocks to replace the present 50-cycle time keepers that will be outmoded as soon as the Boulder Dam electric system gets into operation. Otherwise the old clocks with the new 50-cycle impulse would make the citizens speed up 20 per cent. faster than previously.

The greatest of the fancy skaters will tell you that, contrary to popular belief, one doesn't need strong ankles to succeed at that sport.

Those who suffer from acid should avoid three fruits—cherries, cranberries and plums. 2151

## SELECTED RECIPES

## BROWN BREAD

- 1 cup wholewheat flour
  - 2 cups wheat flour
  - 1 teaspoon baking powder.
  - ½ cup Edwardsburg "Crown Brand" Corn Syrup
  - 2 cups sour milk
  - 1 cup flaked bran
  - 1½ teaspoons soda
  - 2 teaspoons salt
  - 1 tablespoon Mazola
- Mix dry ingredients; add syrup. Mazola and sour milk. Beat well. Pour into oiled bread pan and let stand 1 hour. Bake in moderate oven at 350 degrees F. for 1-1½ hours. Recipe makes 1 large loaf.

## Sir James Barrie

Author Of Peter Pan Celebrates His 76th Birthday

Sir James M. Barrie spent his 76th birthday quietly on May 10th in the famous flat where the immortal Peter Pan was born.

Callers who were not allowed to see him were assured by his Scottish housekeeper that the famous author was "verra weel, thank ye kindly."

Sprigs of heather brought greetings to the "author who will never grow old" from his native Kilmuir, while other friends remembered him with flowers and telegrams.

## New Shipping Service

A one-way shipping service between Montreal and Australian ports was announced by Montreal Shipping Company, agents for the North German Lloyd line. Three vessels of the German line, Weigand, Augsburg and Wido, will make the run which starts from Montreal July 15.

Insects devour one-tenth of the world's crops.

## Cannot Live Abroad

Queen Of Netherlands Not Allowed To Marry Foreigner

Princess Juliana observed her 27th birthday on April 30, with all the Netherlands wondering when and if the plump, vigorous heiress to the throne would marry.

The people made no secret, in public conversations of their desire to see Juliana married. The popularity of the princess has intensified the wish for a royal wedding.

Where to find a suitable prince-consort, however, remained a difficult question. The Netherlands constitution expressly precludes marriage of the queen to a foreign sovereign or his heir apparent, and the queen may live nowhere except in her own country.

Halstead street, in Chicago, containing representatives of practically every race in the world, is more than seven miles long.

Coleman Hot Plate  
Cooks with Air!

Christie's  
Biscuits

"There's a Christie Biscuit for every taste"

## Intensive Competition Between Weeds and Other Plants Always In Evidence

Plant competition is a natural phenomenon in which plants of the same or unrelated species growing in close proximity develop at the expense of their weaker rivals. This competition is of general occurrence in the plant kingdom both among native species under natural conditions and between crops and weeds in cultivated fields. In a recent issue of "Scientific Agriculture," T. K. Pavlychenko and J. B. Harrington of Saskatchewan University of Saskatoon give some interesting information on the subject, together with results of experiments carried out at the Weed Nursery of the University's experimental farm.

Observations over a period of several years indicate that competition between overlapping root systems takes place long before the tops of the plants begin to shade one another. In short, competition commences under the soil surface when the root systems overlap in their search for water and food, and manifests itself immediately in the retarded development of the top growth, becoming intensified by the top growth competition for light only after shading of one plant by another has taken place.

Moisture, the predominant limiting factor in plant growth on the open plains of Western Canada, is the most important consideration in weeds versus crop competition in that area. In one of the experiments it was found that the yield of Marquis wheat was 40 per cent. lower in plots infested with wild mustard than in plots free from weeds. Plants of barley, wheat, and wild oats grown alone in areas ten feet square, attained approximately ten times as large a growth of top and root system as plants grown in ordinary six-inch drill rows. Plants of hares ear mustard, common wild mustard, and Russian thistle, when grown alone, produced from 100 to 1,000 times the growth they had when grown in ordinary six-inch drill rows.

In a weed-versus-cereal competition study, Hanchen barley competed much more successfully with wild oats and wild mustard than did Marquis wheat. This is due to the fact that Hanchen barley at five days after emergence usually has a larger number of seminal roots, and 22 days after emergence it develops more crown roots than Marquis wheat. Marquis wheat in the same study competed fairly successfully with wild mustard, having a total root system 50 per cent. longer than the mustard, but was badly outdone by wild oats, the latter having more than four times as large a total root length.

### Where Thanks Are Due

**Aboriginal Americans Developed Some Things New In Use**  
The Irish potato is not Irish. It is not even a potato.  
Sea Island and Egyptian cotton, the two best varieties, were developed neither on sea islands nor in Egypt.

Down to the time of our grandmothers, the tomato, or "love-apple," was shunned as poisonous. Only the South American Indians knew what good food it was.

For these three and many other agricultural products, modern man must thank the aboriginal Americans, probably the first, certainly the best, primitive farmer in the world, though until recently he got little credit for it.

### Money Is Picked Off Trees

They were picking \$5 bills off of willow trees and cornstalks along the French Broad river near Danbridge, Tenn. The money apparently was deposited by recent high water. Business was nearly at a standstill as folks went out to hunt money. There was one unsubstantiated theory that the money might be part of \$50,000 missing from a Charlotte, N.C., mail robbery.

The Australian government will send a trade delegation to India.

### Plant From The West

R.C. Paper Refers To Position Of The Western Provinces

"The epithet 'pauper provinces,' applied by Parliament Hill to those provinces that have been seeking financial relief from Ottawa, explains in its own implied derision just why, in the eyes of eastern magnates, those provinces are 'paupers.' How could they be anything else, even when they are endowed with the riches and variety of products of British Columbia?"

We in British Columbia have just settled down to be a sort of branch office of the east. Every yard of silk we buy, for instance, is made in an eastern factory.

The housewife in Vancouver pays from 50 cents to \$5 a yard for that silk. If she were allowed to bring it in from Japan, where we have to sell our own goods in world competition, the price would be half of that.

The same principle applies to motor cars and to all major products that take long freight rates from eastern factories.

British Columbians have no objections to buying those eastern goods and paying those high prices for them if there are compensating economic factors.

But the cards are all against us.—Vancouver Sun.

### The Peak Of Endurance

People In Early Middle Age Able To Stand Most

The Lancet, famous British professional medical journal, based an article on the "peak of human endurance" largely on the experience of the three Toronto men entombed recently by a fall of rock in a Moose River, N.S., gold mine.

"The rescue shows," says The Lancet, "what men in extremity can endure and to what extent the spark of life can flicker eventually to kindle once more to steady flame."

The Lancet expresses the opinion peak endurance is probably reached at what is known as "early middle age." "Too old at 40" is probably only applicable to enterprises where carelessness is not a liability and where speed is essential.

### A Sound Argument

The Canadian Federation of the Blind submits the following very sound argument: "Justification for granting pensions to the blind is much greater than that of the aged. In the majority of cases a sighted aged person had at some time during his life the opportunity of providing for old age. The blind have never had this opportunity."

An automobile will travel 43 per cent. farther at a speed of 60 miles an hour on a gallon of gasoline with clean spark plugs than with soiled or worn ones.

## Census Of Agriculture Is For The Benefit Of The Farming Industry

### Keeping Brain Active

Like Other Organs It Must Have Proper Exercise

Persons who live sensibly and carefully in the first 30 years of their lifetime need have little to fear of mental diseases in later years, Dr. Bernard Sachs, former president of the New York Academy of Medicine, said. By "sensible living," Dr. Sachs said, he meant an avoidance of "the ravaging influences of alcohol, drug addiction and blood diseases."

The brain is not unlike other organs of the body. It is subject to deterioration with age as other organs are; but if it has not been abused, it stands as good a chance as any other organ to continue to function satisfactorily, and like other organs, to keep it functioning in a reasonable way is the best way to keep it going. So far as the brain is concerned, variety is indeed the spice of life. Keep the mind going but vary its occupation—change is essential.

Dr. Sachs' recipe for a healthy mind follows:

"Do not become a humdrum thinker; develop 'outside interests.'"

"Take a holiday before you need it."

"Don't develop the notion that life's work has been done, that old age is coming on, and that it is best to sit down quietly and wait for the end. That sort of philosophy works out very badly and accounts for a very large number of hypochondriacs of later life."

### Know His Own Home

Donkey Proved To Court Who Was His Master

The intelligence of a donkey at Cairo saved its master from prison. Discovering that his animal had been stolen the man informed the police.

Later he saw his donkey staggering along the road under a heavy weight. Seizing the man leading it, he took him to the police station and related his story. There he was informed that he must prove ownership.

The peasant replied that he was willing to go to prison if the donkey was not able of its own accord to find its way back to his stable.

The donkey was set free on a bridge and walked straight home.

Grand Manan, an island off New Brunswick, produces more mackerel than any other area in Canada.

In Munich, Germany, it is against the law to read a book written by Theodore Dreiser.

### Easy Stitches Make Gay Linens

### PATTERN 5516

Let this ambitious Jumbo and his frisky antics lighten your household tasks and brighten your tea towels. Choose colorful cotton flims. You can do the motifs in outline stitch or if you wish in applique. There's one for every day of the week and these lucky elephant towels make grand gifts or party prizes.

In pattern 5516 you will find a transfer pattern of seven motifs averaging 4 1/2 x 7 inches and applique pattern pieces; color suggestions; material requirements; illustrations of all stitches needed. To obtain this pattern send 20 cents in stamps or coin (not preferred) to Household Arts Dept., Winnipeg Newspaper Union, 176 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

The Census of Agriculture, which is to be taken on the first day of June, is primarily for the benefit of the farming industry and if taken accurately will be of great value in the study of agricultural conditions. It is extremely important therefore, says the Dominion Bureau of Statistics, that a complete and accurate record of agricultural operations be taken.

The report when published will be a mine of information for all those interested in the problems of the farmers of the Prairie Provinces. It is of the utmost importance that the figures contributed by each farmer shall be complete and accurate so that the best possible inventory of the leading industry will be effected.

The Census of Agriculture aims at securing accurate statistics relative to farm lands, buildings, live stock, mortgaged debt, etc., as at June 1; statistics for 1935 concerning crops, live stock products, farm expenses and products sold; statistics of incidental agricultural production, live stock, animal products, etc., on plots of less than one acre, and statistics of vacant and abandoned farms.

There is an absolute guarantee that no information given will be used otherwise than in preparing the census figures. The individual answering the questions is completely protected. All officials connected with the census are bound by an oath of secrecy and there is therefore no reason whatever why a farmer should not co-operate by supplying the census enumerators with complete and accurate information. Thoroughly effective remedial policies can only be created when facts are available.

A farm, for census purposes, is all the land farmed by one person with, or without help. It must be of one acre or more and must have produced agricultural products to the value of \$50 in 1935. A man who owns a certain amount of land might rent part of it. This will be entered on the census records as two farms, the land farmed by each man being considered as a unit. On the other hand, a man renting various tracts of land from different owners will be regarded as operating one farm only, the various pieces of land constituting one unit. If, however, the tracts are in different enumerations areas or if a manager is hired to supervise a certain portion of the land, that portion will go down as a separate farm.

The farm population on June 1 will be ascertained together with the number of persons who have permanently left the farm as well as those who have come to live permanently on farms.

The information requested on the general farm schedule covers the operator, population of the farm on June 1, persons employed to do the farm work in 1935, condition of farms, the value of the farm and equipment and the amounts of mortgaged debt and liens, with the rate of interest paid, farm expenses in 1935, farm facilities in 1935, forest products produced in 1935, co-operative marketing, crop averages in 1935, acreage and production in 1935, with information relating to crop failure, live stock on June 1, animal products raised in 1935 and whether they were consumed on the farm or sold, pure bred animals on farms, and the value of products sold off the farms in 1935.

### Feats Of Feasting

A few weeks ago everybody was asking the question, how long could the catamined men at Moose River live without sustenance? The following interesting item from the "25 years ago" column of The Ottawa Journal, may provide the answer in part: "A Toronto man undertook an 18-day fast for the good of his health. He was coming along splendidly up to the 18th day, when he died."

A new telescoping wagon tongue makes it possible for a farmer to hook a string of loaded wagons together, and the use of the usual hard work and mashed fingers.

## WORLD HAPPENINGS BRIEFLY TOLD

Every week the Braille Mail, issued in Braille type by the National Institute for the Blind in London, is published for 75,000 blind of the United Kingdom.

Eighteen shillings unearthed at Recup, England, 14 of the reign of George III, three of George IV, and one of Queen Victoria, have been declared the property of the crown.

Cougars will be "on the spot" in British Columbia this year. Effective May 15, the bounty for killing the animals is \$20. Double that of last season.

A government bill incorporating many changes in the criminal code will be introduced this session, Minister of Justice Lapointe announced in the House of Commons.

Mrs. John Bracken, wife of Manitoba's premier, was re-elected provincial commissioner of Girl Guides in Manitoba when the provincial guide council met at Brandon. The membership now totals 4,585.

President Eamon De Valera was given an enthusiastic reception in Dublin on his return from Zurich where he underwent an operation for cataract of the eye. He appeared in excellent health.

Miss Margaret Nicholson, of the Saskatoon Young Women's Christian Association, has been appointed health director of Sherbrooke, Que., Y.W.C.A., succeeding Miss Evelyn Davies.

Tom Marks, 81, as popular with theatre-goers of a bygone era in Canada as any modern actor to step before footlights or dazzle a movie audience, died recently at Christy's Lake, Ont.

Rt. Rev. A. L. Fleming, bishop of the Arctic, said that \$7,567 had been received to date towards building a new hospital to replace All Saints Anglican hospital, Akilvik, N.W.T., which was destroyed by fire April 6.

### Pineapple Tariff Cut

Reduction in the tariff on canned pineapples from Australia was announced in a departmental bulletin issued by Hon. J. L. Halsey, revenue minister. Under the Australian agreement of 1931 these were admitted under a duty of one cent per pound. From April 14 this commodity will enter from Australia duty free.

Of the 30,000 students enrolled at the University of Paris, France, during the 1932 session, 2,000 were Americans.

## RHEUMATISM

—often results from clogged and inflamed kidneys allowing acid toxins to get into your blood. Take GIN PILLS to drive out these pain-causing impurities and soothe and strengthen your kidneys.

## New York's Latest Craze

Train Carries People To Country For Bicycle Riding

Those who pictured New Yorkers as incapable of being torn away from theatres and night clubs revised their opinion last winter when ski trains hauled 12,000 on a single week-end to the snow slopes of the Adirondacks.

The illusion is again shattered by the inauguration of a "bicycle train" service. On a recent Sunday the first bicycle train of the season carried 222 cycling enthusiasts to a rural district of Massachusetts, waited while they "wheeled" merrily over a 20-mile course among the violet and cow-pungent meadows, and then whisked them back to the city in time for a good night's recuperation before the toils of Monday.

It was reported as a day rich in the enjoyment of nature and exercise. A seasoned, solitary outdoor student might find fault with the arrangement, since a cyclist accompanied by 221 others, noisily chattering, is not exactly alone with Nature, but 221 are considerably less than 7,000,000, and doubtless to a New Yorker a country area containing as few people as that is practically a vacuum.

As for exercises, the excursion left nothing to be desired. Any one out of training who rides a bicycle 26 miles knows he has been some place. Pounding was noticeably reduced—the purpose for which some went—muscles were toned up, and many a fine charlie horse acquired to serve as a reminder of the toiling day of the week to follow.

More joy to the New York outers.—Detroit News.

## YOUR GARDEN

First flowers to be sown are those very hardy kinds which naturally reproduce themselves in Canada, such as Cosmos, California Poppy, Alyssum, Calendula and Candytuft. In the second group are the Zinnia, Marigold, Nasturtium, Stocks, Aster and Petunia, which do not stand serious frost, and of the tender things which must be held back until all danger of freezing is over, are the Dahlias, Cannas and Gladioli. As the latter are all bulbs and do not come up until a week or so after planting, they may be risked within a few days of the arrival of really warm weather. One is well advised to save a little seed of each variety from all plantings in order to fill in inevitable "misses" caused by drought, washings or other things beyond control. In the perennial flower bed there will also be gaps where winter-killing has occurred. These may be filled in with quick growing annuals.

Seed should not be sown too deep and plants should not be allowed to grow too close together. Very fine seed like that of the poppy and Alyssum, for instance, is best mixed with otherwise the seed will not go very far and will be put in much too close together. With such small seed merely pressing into finely prepared soil will be sufficient. The general rule is to sow to a depth of three times the diameter of the seed. This will mean pressing in most flowers, except things like Castor Beans, Nasturtium and Sweet Peas, which are large and should be covered about an inch deep. Bulbs or corns, like the Dahlia, should be put down quite a piece, from four inches to a foot. Fine vegetable seed such as lettuce and carrots is best sown in rows, and the rows raked lightly over, beets buried about half an inch and beans and peas about an inch. Thinning of both flowers and vegetables is important after the plants are up an inch or so. With flowers a good rule is to have half as much space between as the plants will be high. This will be about a foot between ordinary Marigold, Petunias and Asters, two to three feet between Cosmos and Dahlias, but only an inch or so separating tiny Alyssum, Lobelia and other edging plants. Well spaced flowers will be more sturdy and thus resist heavy wind and rain. Even the smallest vegetables such as lettuce and radish must be thinned too. An inch or so will be sufficient and that is also all the room that will be needed for carrots and beets, because when these things have developed roots an inch thick and two or three long, every other plant should be removed and used, and this proceeding followed until the whole row is used up.

Husband (in new car): "The engine is overheated."  
Wife (calmly): "Then why don't you turn off the radiator?"

Egypt will build a new airport at Port Said. 2123

## SUNDAY SCHOOL LESSON

MAY 24

### BUILDING FOR THE FUTURE

Golden text: In your patience ye shall win your souls. Luke 21:19  
Lesson: Luke 20:1-21, 38.  
Devotional reading: I Timothy 6: 11-19.

### Explanations and Comments

A Prophecy of the Fall of Jerusalem and of the Second Advent, Luke 21:35-36. Some of the people present began to talk about the wonderful stones and fine offerings that adorned the temple. Matthew says that it was one of the disciples who drew Jesus' attention to the glories of the temple. The stones in the foundation were enormous, and there were columns fifty feet in height of one block of marble. "The gifts to the temple were many and costly, from the great houses of the earth; a table from Ptolemy, a chair from Agrippa, a golden vine from Herod the Great. The temple was famous for its wealth."

The days will come, Jesus prophesied, in which shall not be left one stone of the temple upon another, that shall not be thrown down. This prediction was literally fulfilled forty years later. Josephus writing about the destruction of the Jerusalem temple, says: "The orders to demolish the whole city and temple, except the highest towers and the wall west. All the rest was so thoroughly laid even with the ground by those that dug it up to the foundation, that there was left nothing to make those who came thither believe that it had ever been inhabited." "On the ninth day of Ab," the Talmud says, "the city of Jerusalem was ploughed up."

A Call to Understanding Living. Our Scripture sections for today's study are taken from what has been called Jesus' eschatological discourse. This discourse is not advising his followers to be steady and trustful and not let themselves be led astray or unduly frightened. Wholesome, helpful, rather matter-of-fact advice it was, but suited well to the occasion. Jesus is not advising, let it be understood, his followers not be interested in these great and tragic events which he sees coming, but he insists that even in face of them they ought not to get panicky, but possess their souls in trust and patience and live lives of faithfulness and service. Those to whom the things of the spirit are the great things should be able to do this.

The Battle of New Orleans was fought more than a month after the signing of peace in the War of 1812 between England and America.

It will soon be possible to circle the earth by air in 17 days when the two remaining gaps in the circuit in the Far East are completed.

## MOTHERS, DAUGHTERS

NO need for women or girls to suffer every colic, pain, headache or headache. In girlhood Dr. Pierce's Favorite Prescription is a very beneficial tonic. This is what

Mrs. Wm. Rowell of 20 Manchester St., Guilford, Ont., said: "My complexion faded, and I felt tired out day after day. I had frequent headaches and would do so much. I had Dr. Pierce's Favorite Prescription. I believe it helped me in every way. My complexion improved. I am now a healthy, happy woman. Buy now of your nearest druggist. Write to Dr. Pierce's Clinic, Buffalo, N. Y."

### Will Carry On Research

McGill Student To Study Canadian Period History In France

Blank pages in Canada's history—particularly the period from 1713 to 1763—will be filled by a young McGill University student who will leave for France next winter.

Alice Jean Lunn, recently awarded a \$1,500 Royal Society of Canada Fellowship, will carry on research in the archives of Paris and French ports in an effort to clear up some obscure points in Canadian history. Author of "War and Agriculture in Canada, 1740-1760," Miss Lunn has been awarded three scholarships at the university.

South Africa is trying to stop the rural youth migration to cities.

### Extraordinary Dresses

Canton Police Place Stamp On Many Girls' Clothing

Daring young ladies of Canton who appear on the streets with bare arms may continue to do so if their garb bears the label "extraordinary dress." One hundred girls, mainly university co-eds, who sought to emulate the dress example of their western sisters, were rounded up recently by police and charged with violating the law prohibiting bare arms. They were lectured by magistrates, then permitted to go forth after a rubber stamp reading "extraordinary dress" had been applied to their clothes.

## It's the Talk of the Quilting Bee

Household Arts by Alice Brooks

Pineapple Pattern is Easy to Cut

Pineapple

### PATTERN 5591

It's most certainly the talk of the quilting bee—this quaint Pineapple pattern! And why wouldn't it be? With nearly all the patch pieces the same width, you can cut your fabric into strips and snip off pieces as needed. Easily made, you start from the centre and sew round and round till the block is done.

In pattern 5591 you will find the Block Chart, an illustration for cutting, sewing and finishing, together with yardage chart, diagram of quilt to help arrange the blocks for single and double bed size, and a diagram of block which serves as a guide for placing the patches and suggests contrasting materials.

To obtain this pattern send 20 cents in stamps or coin (cash preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

## TAKE STEPS TO MAKE THE LEAGUE MORE EFFECTIVE

Geneva.—International jurists began active work to make the League of Nations more effective.

The first suggestions were submitted by Nicholas Socrates Politis, former foreign minister of Greece, recognized as one of the greatest European juridical authorities.

Politis handed to Joseph Paul-Boncour, French delegate to Geneva, his recommendations on possible amendments to the league covenant. The council, which postponed its deliberations on the Italian invasion of Ethiopia after the Fascist delegation withdrew from the session, adjourned after two meetings—one private and one public.

At the former, the members decided to hold a special session on the Italo-Ethiopian dispute June 16 instead of a day earlier, as previously announced.

Other subjects placed on the agenda for the June meeting were the Locarno problem, resulting from Germany's occupation of the Rhineland, and the international slavery question.

The public session was devoted to the proposal to create a council seat for China. The council decided to refer the proposal to the league assembly in September.

The council meetings were completely overshadowed by discussions behind the scenes on the problem of reorganizing and revitalizing the league's peace machinery.

## Reduced Rates On Coal

Want Lower Freight Rates In West To Meet Competition

Saskatoon.—Lower railway rates in order to make coal a more attractive fuel and hence increase its market will be one thing for which the new executive of the Western Canada Fuel Association will press during the next year. This was unanimously decided at a general meeting of the association here.

By a unanimous vote the mine operators, wholesale and retail coal merchants instructed the chief executive officers of the association to approach the officials of both railway companies with a view to getting reduced freight rates in western Canada. In urging this move dealers pointed out that transportation costs were the largest single item in the price of coal in more distant markets. A reduction in freight rates would enable coal to meet the competition from substitute fuels, particularly in the Winnipeg market.

## Loans Being Consolidated

Ottawa Announces Policy Regarding Advances To Manitoba

Ottawa.—Loans of the Dominion to Manitoba which have matured recently or will mature within a short time will be consolidated into one amount and renewed until June 15, 1937. An order-in-council tabled in the House of Commons provides for renewal of these loans.

The Dominion also renewed for one year its guarantee of Manitoba treasury bills totalling \$6,874,087 which matured at the beginning of this month.

## Sugar Consumption Increased

Ottawa.—Canada's consumption of sugar last year amounted to 981,109-960 pounds according to a return tabled by Trade Minister Euler in the House of Commons. This was the highest figure since 1931 when sugar consumption totalled 1,005,906,912 pounds.

## To Help Livestock Industry

Winnipeg.—Formation of a national fact-finding body to represent the livestock industry in Canada was approved at a meeting of the Western Livestock Union here. The recommendation will be forwarded to the federal government.

Installation of electric lights and running water in Mecca, Holy City of the Moslems, is to be started at once.

## B.C. Motor Roads

Dust Free Road From Banff To U.S. Boundary Is Considered

Ottawa.—Construction of dust-free roads from the United States boundary to the Banff National Park is being considered, Interior Minister T. A. Crerar told the House of Commons.

The Dominion has spent \$10,000-000 on the park and last year only 4,800 American cars visited it. The minister said many Americans turned back after a few miles of the dusty, gravel roads.

It was a question of deciding what roads to resurface, Hon. R. B. Bennett, Conservative leader said. One of the difficulties of the park was the fact the Jasper highway was not completed nor the road to the coast. Tourists must return by the road they entered.

Hon. H. H. Stevens (Recon, East Kootenay) put in a word for parks in British Columbia. He believed it should be a national policy to open national parks to American tourists.

American tourists returned home and warned their friends not to use western Canadian roads because of the dust, Mr. Stevens said. He suggested a national road in each province tapping the parks.

H. C. Green (Con., Vancouver South) wanted the trans-Canada highway completed first, the last gap being the Big Bend highway.

Mr. Crerar said he believed if the roads were dust-proofed from King's Gate to Banff and from there to Calgary and to Waterton park many thousands of tourists would use them. The minister said he would discuss with British Columbia representatives the dust-proofing of roads on the west side of the mountains.

J. A. MacKinnon (Lib., Edmonton West) proposed a connecting link between Jasper and the trans-Canada.

## Free Trade Zones

Say Canada Will Derive Benefit From Free Ports

Ottawa.—The senate gave second reading to a bill to establish "free ports" or "free foreign trade zones" in Canada and a special committee will study the proposal before the bill is advanced further.

Senator J. F. B. Cagrain (Lib., Montreal), who introduced the bill, urged Canada under the proposal would derive benefits similar to those obtained by numerous European nations which established "free ports." The bill gives authority to the minister of national revenue to license a public body, a province or municipality to organize and conduct at their expense "free ports" at approved places.

Duty would be collected on goods reimported from these ports only if they were consigned to persons in Canada. If the goods were sent to foreign countries, there would be no excise duty.

Manufacturing would be stimulated at such ports, said Senator Cagrain. Also, an immense transshipment business would be built up. "And it would not cost the taxpayers of the country one cent," he added.

## Makes Record Trip

Zeppelin Hindenburg Crosses Atlantic In 48 Hours

Frankfort-On-Main, Germany.—The Zeppelin Hindenburg arrived over the aerodrome here, completing its return from its maiden trip to the United States.

The German dirigible took 48 hours, 27½ minutes to make its return flight. It took 61 hours, 53 minutes for its crossing from Friedrichshafen, Germany, to Lakehurst, N.J.

The Hindenburg bettered existing records for both the eastward and westward crossings. The best previous mark from the United States to Germany was set by the Graf Zeppelin in August, 1928, when it flew from Lakehurst to Friedrichshafen in 54 hours.

The previous westward record was set by the LZ-129, then known as the ZR-3, in October, 1924, when Dr. Hugo Eckener brought the airship across the Atlantic in 81 hours, 17 minutes.

## HONOURED

M. E. Nichols, vice-president and managing director of the Vancouver Province, who was elected honorary president of the Canadian Press, an unique honour in Canadian newspaperdom, bestowed only as a "mark of worth for meritorious service to the corporation."

## Stellarton Miner Killed

One Of The Men Who Helped At Moose River Meets Death In Mine Shaft

Stellarton, N.S.—Joe Campbell, one of the Stellarton miners who risked their lives to save Dr. D. E. Robertson and Alfred Scadding, died in the depths of MacGregor shaft.

A roaring "coal trip"—a string of loaded cars returning to the surface—struck the 27-year-old Campbell 4,000 feet underground and killed him almost instantly.

He was among the miners and draggermen in the Reynolds' shaft when the last barrier to Robertson, Scadding and the body of Magill was broken 10 days after the collapse.

He is survived by his widow and one child.

## To Visit Grain Buyers

Official Of Canadian Wheat Board Leaves For Old Country

Winnipeg.—On an extended holiday to the old country, George H. McIvor, assistant chief commissioner of the Canadian wheat board, will consult with the grain trade and millers in Europe.

Announcement of Mr. McIvor's visit was made at the wheat board offices. Mr. McIvor is accompanied by Dr. W. F. Geddes, chemist in charge of the grain research laboratory of the board of grain commissioners here.

## Radio Advertising

Urge Wider Use Of Air At A Lower Cost

Ottawa.—Reorganization of radio control in Canada along lines that would permit wider use of the air at a lower cost to advertisers was urged upon the parliamentary committee on broadcasting.

Representatives of associations of Canadian advertisers, advertising agencies and broadcasters, suggested establishment of a general manager system with a board of governors acting in an advisory capacity.

It was urged contracts between the governing radio body and the radio-wire companies be such that network facilities could be sub-let to advertisers at attractive rates.

The advertisers urged that radio be permitted to mention the price of advertised articles which they are now forbidden to do.

It was suggested the national system of control be restricted to program arrangements and regulations, and that the government not engage in commercial broadcasting.

The brief also urged the technical and engineering aspects of radio be referred to the department of marine where it was administered prior to creation of the Canadian radio commission.

C. M. Passmore, of Toronto; Glen Ransman of Tilbury, Ont.; and J. A. MacLaren, of Toronto, spoke for the advertisers and broadcasters.

## Honored By The King

Late Viceroy Of India Has Received New Title

London.—The king approved that a marquessate be conferred on the Earl of Willington, who has just completed a five-year term as viceroy of India.

The king received Lord Willington in audience at Buckingham palace and afterwards the retiring viceroy and Lady Willington had luncheon with His Majesty and Queen Mary.

Freeman Freeman-Thomas was raised to the peerage as Baron Willington in 1910. In 1924 he was created a viscount and in 1931, on his appointment as viceroy of India after completing a term as governor-general of Canada, he was created first Earl of Willington. As a marquess, he will probably retain his association with Willington, Sussex, taking the title Marquess of Willington.

## Praises Canadian Red Cross

Ottawa.—Lady Tweeddale in a statement issued on behalf of the Canadian Red Cross Society on British Empire Red Cross Day and the 116th anniversary of the birth of Florence Nightingale, said both she and the Governor-General were "much impressed by the admirable way in which the Red Cross of Canada has translated the ideals of Florence Nightingale into effect."

## THE GOOSE GOES "GADDING"

At a summer resort near Regina, a Canada Goose has become very friendly with the lifeguard, M. P. Ryan, and is very popular. The goose, which has been named "Honker", will answer Mr. Ryan's call, walk with him on the beach or swim beside him in the water. Honker will answer Mr. Ryan's call from half a mile away if the wind is favorable, and will even oblige any press photographer who may wish to take a picture of Honker and his friend. Here is the unusual goose with Mr. Ryan, who apparently knows Honker's weak spot—ice cream in the cone.

## ETHIOPIANS SET UP A NEW SEAT OF GOVERNMENT

Khartoum.—Loyal followers of Emperor Haile Selassie have established an Ethiopian government in the Gore region close to the Anglo-Egyptian Sudan frontier. British authorities were informed here.

Gore is about 250 miles southwest of Addis Ababa and only about 50 miles east of Gambela, Ethiopian trading centre now under the jurisdiction of Sudan authorities by virtue of a lease arranged in the tri-power treaty of 1906.

Capt. E. N. Erskine, British consul in the Gore region, announced establishment of the Ethiopian administration in a despatch to Sudan authorities. Police and troops under the government's orders are patrolling the region, arresting bands of armed army deserters, the despatch said.

No indication was given as to whether the government had been set up in the town of Gore or in the mountainous district outside the city. The Ethiopians were believed anxious to keep their exact location secret, fearing an air attack by Italian planes stationed at Addis Ababa.

Despatches from Addis Ababa said an Italian motorized column had left there for Gore to bring the region under Italian control.

## Annuity Rates Too Low

Canadian Government Should Charge More States Chief Actuary

Ottawa.—As a result of the increase in life expectancy in the last quarter-century, purchasers of Canadian government annuities should be paying rates 25 per cent above those prevailing. A. D. Watson, chief actuary of the Dominion insurance department, estimated at a meeting of a senate special committee.

On the basis, he said, \$26,000,000 should have been collected in purchases in place of \$21,000,000 on annuity contracts made last year.

Increase in life expectancy among industrial policyholders was from 46.63 per cent in 1911 to 51.19 per cent in 1934, according to figures of a leading insurance company, he said.

Recognizing this, groups of insurance companies increased their rates from 27 to 33 per cent but annuity rates had not been changed since the scheme started in 1908. British government rates had been raised.

## Nazi Ship At Montreal

No Disturbance Greeted Arrival Of German Cruiser

Montreal.—The German cruiser Emden docked at Montreal, May 12, slipping quietly out of a thick morning fog to tie up at Laurier pier.

Cordons of police held back crowds of civilians on shore to greet the German vessel but within sight of the ship there was no disturbance.

A few streets from the waterfront, however, police—250 strong—broke up a crowd of 200 persons attempting an anti-Nazi demonstration. Ten persons, including three women, were arrested and charged with disturbing the peace.

The Emden is the first vessel to fly the Nazi flag up the St. Lawrence river and the first German warship to come upstream since before the Great War. She is the third Reich ship to carry the name "Emden," the name made famous in the early months of the Great War by Kaiser Wilhelm's daring sea captain, Von Muller.

## May Take Month's Holiday

Ottawa.—Amendments to letters patent from the king under which the governor-general of Canada carries out duties of his office will permit his absence from Canada for a period not exceeding one month. Heretofore the governor-general could not leave Canadian soil at all without special permission from His Majesty and the appointment of an administrator.

### A TRUE MEASURE OF PROSPERITY.

What we are concerned with and what the farmers' organisations are concerned with is, not the abstract term "prosperous agriculture." We are concerned with the farmer and his family in his home. Prosperity is measured for us by the standard of living which exists in the farm homes and in the lives of those who now inhabit them on these prairies, and who have given the best of their lives to the cultivation of prairie soil. Whatever else exists—cities, factories, railroads—is at best ancillary to farming and at worst a predatory parasite upon it. The farmers of Western Canada and their organisations hold firmly to this view and will fight all comers in their determination to maintain and enhance the comfort and well-being of those people now here, and will continue to hold fast to the view that the prosperity of agriculture cannot and will not be measured by the wealth of cities or corporations but by the health, happiness, security and comfort which prevail in the farm homes of the prairies.—The Western Producer.

### THE FACE OF A MAN LIVING MANLIKE.

Two men I honor and no third. First, the toilworn Craftsman that with earth-made Implement laboriously conquers the Earth and makes her man's. Venerable to me is the hard Hand; crooked, coarse; wherein notwithstanding lies a cunning virtue, indefeasibly royal, as of the Sceptre of this Planet. Venerable, too, is the rugged face, all weather-tanned, bespoiled, with its rude intelligence; for it is the face of a Man living manlike.

A second man I honor, and still more highly: Him who is seen toiling for the spiritually indispensable; not only bread, but the bread of Life. Is not he, too, in his duty: endeavoring towards inward Harmony; revealing this, by act or by word, thru all his outward endeavors, be they high or low. Highest of all, when his outward and his inward endeavors are one: when we can name him Artist; not earthly Craftsman only, but inspired Thinker, who with heaven-made Implement conquers Heaven for us! . . . . Unspeakably touching is it, when I find both dignities united; and he that must toil outwardly for the lowest of man's wants, is also toiling inwardly for the highest. Such a one will take thee back to Nazareth. . . . . A light shining in great darkness.—From "Sartor Resartus," by Carlyle.

## Lecture on Australia.

Miss Grace Pattullo, winner of the Australian Government Essay Competition sponsored through Canada by Mr. L. R. MacGregor, Australian Trade Commissioner in Canada, is giving a lecture in the United Church on Friday, March 29, at 8:30 p.m. Miss Pattullo spent five months in Australia, which was the prize for winning the competition, and gives a most delightful word-picture of her trip in that country. She has many curios and articles of interest from Australia to exhibit and add to the interest of her lecture. A good crowd is expected to hear this youthful lecturer tell of the beauties of our Sister Dominion.

## Spruce Grove News.

Quite a crowd of baseball fans accompanied the Grove's team up to Stony Plain on Sunday.

Mr. H. Loeblich is said to be leaving in a short time for Taal, B. C.

Mr. H. Brox is recovering from an attack of the grippie.

The dean of the local cream truckologists tells an amazing story of the recent increase in the volume of cream received.

Sports at the Nichols Cafe are offering wagers of 3 to 1 that the Grove's ball players will win next Sunday's ball game.

Harvey Morrow, a former resident, was a visitor in town on Tuesday.

For a big meal or a good lunch, try Jack Nichols, at the Hotel Restaurant.

## Who!

What was the gent's name who, when the frau, on smell ing his breath, accused him of drinking, replied:

"Not a drop, m'dear! I've been ewing frog's legs. What you smell is the hop!"

## C. N. Train Service.

## Weak with the Grippe.

Miss Anna Hepko, 10845 98th St., Edmonton, writes:

"I was so weak with the Grippe that it made me quite helpless. A friend told me to try Dr. Martin's Tonic Remedy. And it certainly got me on my feet, and built up my strength. That I wish to let everyone know of this Remedy. How quickly it acts and how reliable it is. Children will take it readily, no mixing or nursing. It contains no Laxatives or Narcotics. A quick acting tonic that builds up your Vitality. Dr. Emilie Martin's valuable remedy for Coughs, Colds and La Grippe. Large bottle, 75c., at Hayes Drug Store Stony Plain.

**Young People's Society** of Glory Hills German Baptist Church meets every Tuesday at 8 p.m. in the Church Building. Everybody Welcome.

## Stony Plain and District.

Monday next May 25th, is Victoria Day, and a public holiday. All places of business in Stony Plain will be closed.

Mr. Gus Gitzel, well known here, arrived from Wembley on Tuesday. Gus says the crops at Peace River are further advanced than those in this district.

Mr. and Mrs. L. M. Larson and Mr. and Mrs. George Oppershauser motored to Edmonton on Sunday.

Mr. Clarence Lory had recovered sufficiently from his recent illness to be able to come down to business.

Dr. Haworth, a former resident, moved back last week from Ardrossan, and is now located on his plot of land on the west side of town.

The "fine span of blacks" mentioned last week as having been purchased by Mr. Schlecker for work on his farm, did not last long, as one of the team died the third day after being taken to Mr. Schlecker's farm in Inga district.

BUTTER AND EGGS WANTED at The Royal Cafe.

New and second-hand text books for public and high schools on sale at The Sun Book Shop.

## News of Baseball.

Stony's baseballers got into action Sunday last, and, after a poor start, rallied to defeat Spruce Grove in a ten-inning battle. It was a typical pre-season game, but, nevertheless, it was really a pitchers' battle. Ed Enders pitched for Stony.

Edie Enders leaves for the Coast this week, and it's just as well he's leaving so soon, as the local ball club could use him during the coming ball tournament at Fort Saskatchewan on Monday, May 25th. At any rate, we wish Edie a good journey into the land of the Mohawks.

## Alas! the Poor Farmer!

Some of the farmers who have applied for seed grain thru their municipality are said to be disappointed at the deals which they have been given. The trouble is that they have not been allowed the full quantity of the seed for which they applied.

A sample case shows where a farmer in Loga Municipality who applied for 70 bu. seed wheat, 40 bu. seed oats, and 40 bu. seed barley. When the requisition came back it was found that the 70 bu. of wheat had been reduced to 45 bu.; the oats out from 40 bu. to 20 bu.; and the barley out from 40 bu. to 23 bu.

This farmer claims that, if this amount is all he seeds—and it look at the present time as if it will be all—he will not be in a position at harvest time, when his own requirements are met, to make any payment on the seed grain advanced.

## PRAIRIE PROVINCES FIVE-YEAR CENSUS, JUNE 1st, 1936

## THE CANADIAN GOVERNMENT INVITES THE WILLING CO-OPERATION OF EVERY CITIZEN

COMMENCING June 1st, the usual five-year census of the three Prairie Provinces will be undertaken. The object of this census is to gather statistics by means of which your Government can function more intelligently, more effectively and more economically in the interests of all citizens of the country.

No Government ever yet succeeded or gave its best without a thorough knowledge of its country and its people. That is why we ask your utmost co-operation in the census of the Prairie Provinces which commences at your door, receive him courteously. Give him all the information for which he asks. Remember, he is the agent of good administration and is in your service. Help him to complete his work with all possible despatch. On the accuracy and completeness of your replies to his questions depends the best interest of yourself and your Government.

**ALL INFORMATION IS HELD STRICTLY CONFIDENTIAL.** You can place absolute trust in the official enumerator who calls on you. All information you provide will be held in the strictest confidence. It is compulsory by law to answer the questions put by the enumerator. But you are living up to the spirit of good citizenship as well as to the letter of the law by giving information readily, completely and sincerely.

## Pencils,

a large variety on hand.

## On the Side.

—They're not getting their base dividends down in Danbridge, Tenn., but they've been getting some extra cash money, which they consider just as good. The people there have been picking \$5 bills off willow trees along the banks of French river during the flood. One theory is the money is part of \$80,000 missing from a recent mail robbery.

—Highway thumbers in the U.S.A. are getting particular. Reports from motorists there indicate that some hitch hikers now refuse to ride with a motorist who has no radio in his car.

—Terms are in use today without any very clear idea as to their meaning. The U.S.A. supreme court recently had to determine what was a "hair's breadth." Experts testified that it was two hundred and fiftieth of an inch. Isn't a micrometer the handy tool?

—The needle and thread in the hands of a nifty operative has worked wonders in the world since the day Eve sewed the leaves together for Adam's first Raglan to the day last week when Mrs. Poole of Washington sewed her goldfish together and saved its life. The fish was accidentally dumped on the floor; the bowl broke and a piece of the splintered glass cut the goldfish in two; he was hanging together only by his spine. Mrs. P. whipped out a needle and thread and proceeded to sew up the expiring fish. Put back in water, the fish recovered. Mrs. P. has been recommended for a L.R.C.P.S.

—The very man, says an exchange, who knows the various combination shots on a billiard ball is the gent who has to get holy to decipher the 2-cent sales tax act.

—What became of all those folks who were cocksure last May we'd be going on vacation in 1936 on our base dividends? Answer by mail, phone or wireless.

—The recent record aerial flight from New York to Miami took 4 hrs. 21 min. If this record breaking keeps up, says Christian Science Monitor, the telegraph again "Don't write, telegraph!" will soon be replaced by an airline slogan "Don't telegraph: it's quicker to go yourself!"
